

WinPump  
Copyright 2002 - 2016 IMO AB, Sweden.

WinPump is a support tool to properly select and calculate performance data for IMO AB pumps.

It does, however, not cover all aspects to provide the right pump for the application.

The responsibility for fulfilling the customer's requirements, conformity to standards and legislation, and the suitability of the selected product for the intended application lies always with the sales person/application engineer.

The program may be used only with a licence from IMO AB, issued to an identified person.

Such a licence grants the Licencee a non-exclusive, non-transferable right to use the program

on a single, identified, personal computer for a limited time period. All other use of t

he program is illegal and may be prosecuted. Neither the licence nor the program or associated

data may be sold, leased, assigned, sublicensed or otherwise transferred by the Licencee.

The licence does not include the right to disassemble, extract or modify the program or

any portion thereof nor to extract or use associated data for other purposes than operating the program.

Title to the program and associated data remains exclusively with IMO AB at all times.

IMO AB expressly disclaims all implied warranties of use of the program, its results or the fitness for its purpose.

IMO AB shall under no circumstances be liable for direct, indirect, incidental, special or

consequential damages or expenses, related to the licence or to the installation or use of the program.

IMO AB does not warrant that the program will meet the requirements of the Licencee or that the program

will operate uninterrupted or error free.
